

# Autodrip-Low Cost Automation Kit

Remote Control, Smart Irrigation

New

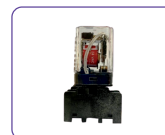

App-Based GSM Controller offering unparalleled control and flexibility for your irrigation system

## Features

- **Scalable Stations:** Start with 4 solenoid valves (24 VAC, 2-way or 3-way) and expand to 12 with an optional module.
- **Customizable Programs:** Create 2 independent programs for irrigation and fertigation, each with 2 start times.
- **Reliable Memory:** Built-in rechargeable battery ensures program retention during power outages.
- **Smart Sensors:** Integrated rain sensor and flow sensor optimize water usage and protect your system.
- **Pump Protection:** Special pump programming prevents dry runs.
- **Flexible Scheduling:** Day selection feature for precise control.
- **Multilingual Support:** Program in your preferred language.
- **Emergency Stop:** Immediate system shutdown in critical situations.
- **Centralized Control:** Manage multiple devices from a single app.
- **Shared Access:** Up to 5 users can log into the same device with different languages.
- **Real-time Monitoring:** Track individual valve status and remaining run times.
- **Customer Support:** File complaints directly through the app for prompt assistance.
